CAREER OBJECTIVE

Final-year B.Tech Computer Science student passionate about full-stack web development. I have hands-on experience building real-world web applications using React.js, Node.js, Express.js, MongoDB, and MySQL — from REST APIs to responsive UIs. I enjoy solving problems through code and am looking to grow as a Full Stack Developer in a team where I can contribute, learn, and make an impact.

EXPERIENCE

Full Stack Developer Intern – Cognifyz

May 2026 – Jun 2026

- Developed RESTful APIs using Node.js and Express.js, optimizing server-side logic and data handling.
- Built reusable React.js UI components with efficient state management to improve user experience.
- Collaborated with cross-functional teams on production-ready features and code reviews.
- Debugged and optimized front-end rendering for smoother interactions across user-facing pages.

PROJECTS

PGSphere – PG Management System

Jun 2026

Tech Stack: ReactJS, Node.js, Express.js, MySQL, JWT, REST APIs

- Developed a multi-tenant PG management system with tenant isolation, room allocation, and student management.
- Implemented secure JWT authentication and role-based workflows for PG admins and students.
- Built QR payments, rent tracking, complaint management, notices, and dashboards for streamlined PG operations.

V Mart – E-Commerce Grocery Website

May 2026

Tech Stack: ReactJS, Node.js, Express.js, MongoDB, MySQL, JWT, REST APIs

- Developed a responsive full-stack grocery e-commerce platform with 10+ categories and secure JWT authentication.
- Built a dynamic cart with real-time pricing, coupons, checkout flow, and third-party API integration.
- Developed an admin dashboard for inventory, order tracking, and sales analytic with optimized performance.

Talent Scope – AI-Powered Interview Preparation Platform

Mar 2026

Tech Stack: ReactJS, Node.js, Express.js, MongoDB, Firebase, REST APIs, JWT, Razorpay

- Built an AI interview platform with role-specific questions, Web Speech API voice responses, and an AI avatar.
- Developed an ATS resume checker with PDF parsing, job matching, and personalized AI question generation.
- Integrated Razor pay payments, credit-based access, JWT authentication, and automated PDF performance reports.

TECHNICAL SKILLS

Frontend: ReactJS, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs

Databases: MySQL, MongoDB, Firebase, Redis

Tools & Technologies: Git, GitHub, VS Code, Postman, JWT

Languages: C++, JavaScript

Concepts: OOP, DBMS, Web Security, Authentication & Authorization, REST API, Micro services

Soft Skills: Problem-Solving, Teamwork, Cross-functional Collaboration, Communication, Continuous Learning

EDUCATION

B.Tech – Computer Science & Engineering

2023 – 2027

JECRC University, Jaipur, Rajasthan | CGPA: 8.42/ 10.0

CERTIFICATE

- IBM Skills Network – SQL and Relational Databases 101 | IBM Cognitive Class June 2026
- Goldman Sachs Software Engineering Job Simulation – Forage Feb 2025

ACHIEVEMENTS

- Represented at the state level in Kabaddi.
